## Simple, Affordable, Mobile Bagging Systems

The Go-Bagger 250 is the newest addition to the line of highly successful mobile bagging systems from Rotochopper. The Go-Bagger 250 was designed by Rotochopper engineers as a direct response to our customers' need for a smaller, simpler, affordable, mobile bagging system.

The Go-Bagger 250 can be operated by one person. Larger scale production may involve up to four people. Depending on bag size, product consistency, and equipment configurations, production rates ranging from 200 to 600 bags an hour are possible with mulch, compost, soil, sand, corn, beans, dog food or almost anything you might want to put in a bag.

Weighing a stout 4,500 lbs, the Go-Bagger 250 can be pulled to your worksite with a pick up truck and can be set up and running in minutes.

The Go-Bagger 250 will open up unlimited opportunities to add value to your bulk commodities!

Easy to use foot pedal controls operate the bagging jaws and sealer.
